ELSEVIER

Int. J. Production Economics 42 (1995) 295–296

international journal of
production
economics

Contents Volume 42

Vol. 42, No. 1

A heuristic (*R, T*) periodic review prishable inventory model with led times.
H.N. Chiu 1
Optimal inventory and disposal policies in respose to a sale
C.-K. Chen and K.J. Min 17
Cutting tools versus machine tools investments in FMS design
M. Barad and K. Hoang 29
Developing a full business environment to support just-in-time logistics
C. O'Brien and H. Head 41
Information in accuracy: Implications for economic production scheduling
T.R. Rohleder and G.D. Scudder 51
Simulation analysis of just-in-time production systems
M. Savsar and A. Al-Jawini 67
A compendium and comparison of 25 project evaluation techniques. Part 1: Net present value and rate of return methods
D.S. Remer and A.P. Nieto 79
Dairy of Events 99

Vol. 42, No. 2

A compendium and comparison of 25 project evaluation techniques. Part 2: Ratio, payback, and accounting methods
D.S. Remer and A.P. Neito 101
A periodic review inventory model with Markovian supply availability
M. Parlar, Y. Wang and Y. Gerchak 131
Modelling of performance measurement systems in manufacturing enterprises
U.S. Bititci 137
Inventory policy with time-dependent setup cost
K. Matsuyama 149
An optimal solution algorithm for the constant lot-size model with equal and unequal sized batch shipments for the single product multi-stage production system
M.A. Hoque and B.G. Kingsman 161
The impact of a constraint buffer in a flow shop
L.K. Duclos and M.S. Spencer 175
An integrated manufacturing system design: an applied approach
S. Dowlatshahi 187
Diary of Events 201

0925-5273/95/$09.50 © 1995 Elsevier Science B.V. All rights reserved

Vol. 42, No. 3

Scheduling with two job classes and setup times to minimize the number of tardy jobs
J.N.D. Gupta and J.C. Ho 205
Single-machine earliners–tardiness scheduling about a common due date with tolerances
M.X. Weng and J.A. Ventura 217
An inventory model for items with demands satisfied from stock or by special deliveries
R.H. Hollier, K.L. Mak and C.L. Lam 229
Minimizing a weighted quadratic function of job lateness in the single machine system
T. Sen, P. Dileepan and M.R. Lind 237
A fuzzy decomposition method for multistation production systems subject to blocking
B. Tan and S. Yeralan 245
Techno-economic evaluation of waste lube oil rerefining
M.F. Ali, F. Rahman and A.J. Hamdan 263
Factors underlying operational JIT purchasing practices: Results of an empirical research
G. Nassimbeni 275
Diary of Events 289
